

MELIOR SAUVIGNON (RUEDA)

THE WINE

Wet and mild winter, followed by a hot spring, with an absence of rainfall and some drought, and budding on the vine in the first fortnight of May, with the cycle of a normal year. Dry and mild summer, without extremes of heat, which delayed the ripening process by at least 15 days compared to a normal year. Very slow but balanced final ripening, punctuated by spells of rain, with the harvest extending throughout October.

Alcohol: 14%

Residual sugar: 1,84 g/l

Acidity : 5,4 g/l

Dry extract : 31,5 g/l

750ML
