

Win 5 Verdejo

Frizzante wines

To meet the current trend towards the consumption of cheerful, fun and innovative wines, the Matarromera Group can offer 5.0 WIN, a product line comprising frizzante wines, a Verdejo, fresh, frizzante and low in alcohol.

Its development is made possible by taking special care during the harvesting process, through preserving the grape juice at low temperatures and fermenting the alcohol at 5.0 degrees, which allows the CO2 from the fermentation itself to be maintained, without artificially gasifying it. This fresh wine maintains the characteristic acidity of the Verdejo grape, but also takes on a natural sweetness that makes it a Verdejo with more tropical aromas.

750 ML
